TECHNICAL SKILLS

- **Programming Languages:** Python, C, .NET, SQL, JAVA (Basic)
- **Backend & Cloud:** RESTful APIs, Microservices Architecture, Microsoft Azure, Docker, Git, Pipelines
- **Databases & Tools:** MySQL, Linux, VS Code
- **Security & Best Practices:** OWASP Secure Coding Principles, Integration Testing, Agile / Scrum
- **Data & Analytics:** Pandas, NumPy, Power BI (introductory knowledge)

EDUCATION

Master of Applied Computing | University of Windsor, Windsor, ON Jan 2025 – April 2026

• Topics covered:
Advanced Software Eng. Topics, Advanced Computing concepts, Advanced System prog., Data visualisation, Networking and data security, Internet App and Distributed Sys.

GPA: 73

Bachelor of Technology - Computer Engineering Jul 2020 - May 2024
Gujarat Technical University, Ahmedabad, Gujarat, India.
CGPA: 8.63

PROFESSIONAL EXPERIENCE

Software Engineer Intern (Backend/Python) H-Tech Ltd., Ahmedabad, India Jan 2024 - Nov 2024

- Designed and developed backend modules for web applications using Python and Flask, focusing on scalable RESTful API endpoints and clean modular architecture.
- Practiced SQL queries for data handling and debugging.
- Participated in Agile sprint planning, peer code reviews, and technical documentation standards, utilizing Git version control for collaborative feature deployment.

PROJECTS

Vehicle Fleet Telemetry Dashboard | Python, FastAPI, SQL, Docker, Azure February 2026

(Team project of last term) my contribution included:

1. Developing a backend service to collect and process real-time vehicle performance and diagnostic data.
2. Building fast REST APIs and database connections to store vehicle data securely in SQL.
3. Packing the application into a Docker container and setting it up for Microsoft Azure cloud deployment.

Corporate Expense Management API | Python, Flask, SQL, JWT, OWASP July 2026
(personal project)

1. Created a backend API for tracking corporate expenses with user roles and approval workflows.
2. Implemented secure login using JWT tokens and followed OWASP security guidelines to protect data.
3. Wrote automated tests to check API reliability and catch errors early.

CERTIFICATE

Microsoft Azure Course Certificate | LinkedIn Learning (2025)
